

Umbraco End-of-Life Guide

Solve security, compliance and compatibility issues.

End-of-life is more than a technical milestone—it's a business-critical event:

- Security risk and a lack of updates increases vulnerability.
- Compliance challenges with outdated software may breach regulations.
- Performance decline with an aging CMS stops businesses keeping up with evolving user expectations.

Upgrading ensures access to updates, features, and long-term stability while solving security vulnerabilities, compatibility issues, and performance degradation.

Mitigate business risk

Operational risks

- As your platform ages you'll experience increased system downtime and reliability issues
- Maintenance costs will escalate as workarounds become necessary for outdated systems.
- The accumulation of technical debt will make future upgrades increasingly complex and costly.

Commercial risks

- Customers may experience a degradation in service quality and user experience.
- Competitors are using modern, supported platforms.
- System limitations can impact revenue generation and business growth.

Migration benefits

Technical advantages

- A modern architecture will significantly improve your website's performance and capabilities.
- Enhanced security features and protocols will better protect your digital assets.
- Improved integration capabilities will allow seamless connection with other modern systems.

Business benefits

- Operational costs will decrease with improved efficiency.
- Enhanced customer experience, modern features and faster performance.
- A digital infrastructure future-proofed against technological changes.

Why Growcreate?

"By upgrading to the latest version of Umbraco, GrowCreate has transformed our website from a poor installation to a performance optimised site."

Our advantage

Certified developer guarantee

Our team provides an Umbraco Master guarantee for high-quality upgrades.

Proven Umbraco track record

With 150+ Umbraco sites delivered, we have the experience you can trust.

100% transparent development

Our agile development process keeps you informed every step of the way.

Comprehensive support

End-to-end service from planning to post-migration maintenance.

Migration approach

Consultation

For businesses that need more help:

- We provide an analysis of your website and objectives.
- We deliver customised recommendations for upgrading or rebuilding.
- We help you plan for long-term success.

Upgrade path

For minimally customised websites:

- We assess your Umbraco implementation.
- We plan and execute a step-by-step upgrade.
- We ensure compatibility with integrations and features.

Website rebuild

For businesses needing a fresh start:

- We redesign with modern UX/UI principles.
- We rebuild on the latest long-term supported version of Umbraco.
- We add advanced features and improved performance capabilities.
